

UPLOAD THE DATASET:

The screenshot shows the IBM Cognos Analytics with Watson web application. The browser's address bar displays the URL `us1.ca.analytics.ibm.com/bi/?perspective=home`. The application header includes the title "IBM Cognos Analytics with Watson", a search bar, and user profile information. A prominent notification bar at the top indicates that the file "segmentation data.xlsx" is being analyzed, with a progress bar and "Cancel" and "Details" links. Below this, a welcome message reads "Hello. Welcome to Cognos Analytics with Watson." and provides instructions to get started by watching an introduction video, taking a product tour, or viewing the Getting Started tab. Two buttons, "Watch video" and "Take a product tour", are available. The "Quick launch" section features four tiles: "Upload data", "Prepare data", "Exploration", and "Present data". The "Upload data" tile is currently selected, and a file named "segmentation data.xlsx" is shown in the upload area with a "Show all" link. The Windows taskbar at the bottom shows the time as 3:15 PM on 11/6/2022.

This screenshot shows the same IBM Cognos Analytics with Watson interface, but the upload process is complete. The notification bar now displays a green message: "segmentation data.xlsx was uploaded successfully.", with a "Hide Details" link. The rest of the interface, including the welcome message, product tour buttons, and quick launch tiles, remains the same. The Windows taskbar at the bottom shows the time as 3:16 PM on 11/6/2022.
